SCW Story

Several Forms 990 are posted on the website. EIN# is 562358076

In **1996**, Dr. William DeJong, CEO of DeJONG Inc. (www.DeJONGinc.com), went with his then 16 year old son, Todd DeJong, to do service work through the organization Heart to Honduras in a rural village near the organization's Honduran complex. While he was there he recognized the dilapidated condition of the school buildings and the underserved population of rural students. He made the decision to return to the United States and form a team who could return to **Honduras** to do a more thorough assessment of the facilities in the area he had visited.

In **2002**, SCW became a **Non-profit, 501(c)3 organization** in the United States. The organization was founded by William **DeJong**, CEO of DeJONG and **Charles Newman**, CEO of Newman Architecture (www.NewmanArchitecture.com). To this day, DeJONG has been donating the administrative support to SCW and Newman Architecture the design support. Both Bill and Chuck travel extensively in support of SCW.

In **2004**, **SCW:Honduras** became an NGO in Honduras. A major part of the SCW mission is for this effort to become self-sustaining with a focus on in-country leadership. SCW: Honduras is headed up by **Alejandra Madrid**. Ms. Madrid was one of the original volunteer architecture students working with SCW in 2000. Today Alejandra serves as the Executive Director of SCW: Honduras and coordinates SCW activities in Honduras.

In **2006**, **SCW:Canada** was formed. This organization was co-founded by **Doug Allen** and **Ron McKnight**. The organization has immediately become involved in projects in Honduras to reinforce the overall efforts there. SCW:Canada is a recognized non-profit organization in Canada, has a very active board of directors and continues to fulfill the overall Schools for the Children of the World mission.
